EXPERIENCE

Full-Stack Developer & UI/UX Designer, Kaban, Checkpoint, and Liem Barbershop – *Freelance* July 2026 – Present

- Designed and developed end-to-end web applications, ensuring seamless integration between front-end interfaces and scalable back-end databases
- Created intuitive, user-centered wireframes and interactive prototypes with a strong focus on premium visual aesthetics
- Implemented responsive design systems to ensure visual and functional consistency across all mobile, tablet, and desktop viewports

Virtual Assistant & Lead Generation Specialist, *Freelance* Apr 2026 – May 2026

- Conducted targeted B2B lead generation campaigns and market research to construct high-quality, verified prospect databases
- Managed email outreach initiatives, qualified client leads, and optimized administrative task flows
- Provided scheduling coordination and communications support to improve outreach efficiency

UI/UX Designer, KamAI, BizCard, and Champion – *Freelance* Feb 2025 – Nov 2025

- Designed high-fidelity web and mobile prototypes in Figma for diverse platforms, including KamAI (healthcare EMR), Champion (referral app), and BizCard
- Developed and maintained reusable UI component libraries to establish standard design systems and accelerate frontend implementation
- Mapped interactive user flows and wireframes based on design specification and stakeholder feedback

Freelance UI/UX Designer, Solar E-Bike Store, Footprint, Vero – *Independent / Freelance* Aug 2024 – Dec 2024

- Designed responsive UI/UX mockups, wireframes, and prototypes in Figma tailored to custom client requirements
- Developed structured user flows to outline clean, friction-free user journeys
- Iterated quickly on client feedback to deliver modern and accessible UI assets

PROJECTS

Checkpoint — AI Face Recognition Attendance System attendance-system-nine.vercel.app

- Integrated ArcFace and FAISS vector search with MiniFASNet anti-spoofing for sub-130ms 512-D face matching that blocks photo/screen spoofs
- Built a React dashboard with automated face-quality gating (blur, lighting, scale) and live camera check-ins
- Built a Flask backend with local vector caching to cut database reads, plus an Expo React Native scanning app

KABAN — Digital Treasury & Fee Collection System treasurer-system.vercel.app

- Handles fee collection and dues clearance for 1,000+ students, replacing cashier queues and manual accounting
- Gives students self-service balance lookup and verifiable digital receipts for transparent, trustworthy records
- Automated roster imports and real-time ledger sync, with role-based access for 3 user roles and audit trails

JajaPOS — Offline-First Point of Sale & Inventory System

- Built a 100% offline-first POS on local SQLite with zero cloud costs, using Clean Architecture and Riverpod
- Built a Bill of Materials engine that auto-deducts packaging (cups, lids, straws) from inventory on every checkout
- Built SHA-256 role-based authentication and immutable stock audit logs, with an adaptive dual-pane layout for desktop, tablet, and mobile registers

UI/UX Design Portfolio — Web & Mobile App Designs figma.com/design/Pre-Designs

- Designed in Figma from 2024 to 2026 across healthcare, campus systems, e-government, payments, retail, and environmental apps
- Includes wireframes, high-fidelity prototypes, user flows, and reusable design systems for mobile, tablet, and desktop

EDUCATION

Bachelor of Science in Information Technology – Davao Oriental State University – Banaybanay Campus Expected 2028

SKILLS

UI/UX Design: Figma, Wireframing, Prototyping, Design Systems

Languages & Frameworks: JavaScript, TypeScript, Python, PHP, Dart, HTML/CSS, React, Next.js, React Native, Node.js, Laravel, Flutter, Tailwind

Database & Cloud: Supabase, PostgreSQL, Firebase, MySQL, SQLite, Vercel

Developer Tools & AI: Git, GitHub, Docker, Vite, WordPress, Cursor, Antigravity, Claude, ChatGPT, OpenAI API
