EXPERIENCE

Full-Stack Developer & UI/UX Designer, Kaban, Tala, & Liem Barbershop – *Freelance / Independent* July 2026 – Present

- Designed and developed end-to-end web applications, ensuring seamless integration between front-end interfaces and scalable back-end databases.
- Created intuitive, user-centered wireframes and interactive prototypes with a strong focus on premium visual aesthetics.
- Implemented responsive design systems to ensure visual and functional consistency across all mobile, tablet, and desktop viewports.

Virtual Assistant & Lead Generation Specialist – *Freelance* Apr 2026 – May 2026

- Conducted targeted B2B lead generation campaigns and market research to construct high-quality, verified prospect databases.
- Managed email outreach initiatives, qualified client leads, and optimized administrative task flows.
- Provided scheduling coordination and communications support to improve outreach efficiency.

UI/UX Codesigner, KamAI, BizCard, and Champion – *Freelance* Feb 2025 – Nov 2025

- Designed high-fidelity web and mobile prototypes in Figma for diverse platforms, including KamAI (healthcare EMR), Champion (referral app), and BizCard.
- Developed and maintained reusable UI component libraries to establish standard design systems and accelerate frontend implementation.
- Mapped interactive user flows and wireframes based on design specifications and stakeholder feedback.

Freelance UI/UX Designer – *Independent / Freelance* Aug 2024 – Dec 2024

- Designed responsive UI/UX mockups, wireframes, and prototypes in Figma tailored to custom client requirements.
- Developed structured user flows to outline clean, friction-free user journeys.
- Iterated quickly on client feedback to deliver modern and accessible UI assets.

PROJECTS

Checkpoint — AI Face Recognition Attendance System attendance-system-nine.vercel.app

- Integrated ArcFace and FAISS vector search with MiniFASNet anti-spoofing to achieve sub-130ms 512-D face matching and block photo/screen spoof attacks.
- Developed a React web dashboard featuring automated facial quality gating (blur, lighting, scale) and live camera scanning for event check-ins.
- Built a Python Flask backend with local vector disk caching to eliminate database read costs, alongside an Expo React Native mobile app for portable scanning.

KABAN — Digital Treasury & Fee Collection System treasurer-system.vercel.app

- Streamlined fee collections and dues clearance for 1,000+ students, significantly reducing cashier queue times and manual accounting discrepancies.
- Enhanced fiscal transparency and student trust by providing self-service balance lookup and verifiable digital receipt referencing.
- Automated batch student roster processing and real-time ledger synchronization, safeguarding institutional funds with 3-Factor Authentication and immutable audit trails.

JajaPOS — Offline-First Point of Sale & Inventory System

- Engineered a 100% offline-first POS platform on local SQLite with zero recurring cloud costs, using Clean Architecture and Riverpod for reactive state management.
- Implemented a Bill of Materials (BOM) engine that automatically deducts raw packaging (cups, lids, straws) from inventory on every checkout transaction.
- Built SHA-256 role-based authentication and immutable stock audit logs, alongside an adaptive dual-pane layout for desktop, tablet, and mobile registers.

Figma Design Portfolio — KamAI, BizCard, Champion, Liem Barber Shop figma.com/design/Pre-Designs

- User-friendly design and easy-to-understand layouts across all mobile and desktop wireframes.
- Clean, modern branding and reusable design tokens across all four platforms.
- Consistent, accessible user experience ensuring seamless navigation and cross-device consistency.

EDUCATION

Bachelor of Science in Information Technology – Davao Oriental State University - Banaybanay Campus 2025

SKILLS

UI/UX Design:	Figma, Wireframing, Prototyping, Design Systems
Languages:	JavaScript, TypeScript, Python, PHP, Dart, HTML5, CSS3
Database & Cloud:	Supabase, PostgreSQL, Firebase, MySQL, SQLite
Developer Tools & AI:	Git, GitHub, Docker, Vite, Cursor, AntiGravity, Claude, ChatGPT, Gemini, REST APIs
